

Assignment 6 2023

The purpose of this assignment is to:

- *Use Recursion instead of loops.*
- Create a program without a loop, using recursion to compute $a*b$.
- The user should enter integers a and b . *You do not have to do error checking.*
- *Example output:*

```
This program computes a*b, please enter a: 4
This program computes a*b, please enter b: 6
4 and 6
4 * 6 = 24
```

Submit the .java file.
